FOR
POWER
POINT →

STEPS TO ADD OR CHANGE IMAGE

01
Select image placeholder, then selects replace image menu.

02
Click the icon image, then select your photo from your library.

BASIC GUIDELINE

STEPS TO CHANGE THE COLOR

01. Go to "the items" that you want to change the colors
02. Right-click Format Shape
03. Then choose "Paint Icon."
04. Finally, choose "fill."
05. Select your preferred color.

WE RECOMMEND
SOLID FILL
COLORS FOR
THIS TEMPLATE.

COMMON ISSUE

Are there any missing
items or sections?

Please "send to back the image" if you discover a missing section or item after adding an image placeholder. It will place a placeholder image at the bottom layer and display the missing section.

Why can't I click on the
placeholder "image icon"?

If you discovered the problem clicking the "image icon" on the image placeholder, please consider "send to back" items on top of the placeholder first. this will cause the image icon to appear. You can send the previous items to the front again when you're finished.
