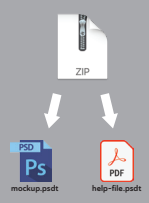
GOOD VIBE DESIGN

Helpfull instructions

THANKS FOR PURCHASING OUR MOCKUP!



After downloading the zip file and opening it you are going to find 2 files: the **Mockup File** and the **Help File.**

WHAT IS **PSDT?**

mockup.psdt

It is a **Photoshop Template File.**
It means that every time the file is opened you have a new “untitled” file to work and save.
The template file will never change.
Just keep it in a safe place.

USING THE MOCKUP

All Mockups made by us is well organized and easy to use. Simple steps:

1. Vector Layers to be edited are described with the part name + [YOUR DESIGN HERE]. Double click on it and create the design. After done, just save and close. Your artwork will wrap the mockup automatically.
** Some mockups have just one vector layer to be edited, and others can have much more.*

2. Colors layers are described as [CHANGE “PART” COLOR].
To edit, double click on the icon layer and change the color.

3. DONE! Just save your image.
